EDUCATION

CUNY Queens College

GPA: 3.1

Bachelor of Arts in Computer Science

Dec 2024

Relevant coursework: Data Structures, Database Systems, Object-Oriented Programming, Computer Architecture, Software Engineering, Operating System, Quantum Cryptography, and Advance Python.

SKILLS

Languages: Java, JavaScript, HTML/CSS, Python, C++, Assembly, SQL

Tools and Frameworks: React, Node.js, Express.js, REST API, MongoDB, GitHub, Git, WordPress, Figma, Llama2, Conda, Appwrite, Pandas, CSV, Streamlit, Linux, Tableau, JSON

EXPERIENCE

Tech Incubator

Queens, New York

Software Engineering Intern

Feb 2024 – Apr 2024

- Designed and developed a no-code mobile app that connects travelers with tailored matches and secure payment options, enhancing user engagement and convenience.
- Collaborated with clients to create custom Wix websites by gathering requirements and translating them into user-friendly designs that met business needs.
- Conducted thorough QA testing across multiple platforms to resolve functional and design issues, ensuring the applications were fully operational and ready for launch.

Evergreen Investments

Remote

Implementation Specialist Intern (Web Developer Intern)

Jul 2023 – Aug 2023

- Simplified and optimized database operations, reducing data transfer costs by reorganizing structures and improving processing efficiency.
- Automated the order processing system by designing a centralized database, replacing manual data entry, and significantly reducing errors.
- Led collaboration with 7+ interns by hosting team discussions to identify roadblocks, propose solutions, and ensure projects were completed on time.
- Redesigned the corporate website with a focus on user-centered UI/UX, improving accessibility and user engagement. Made updates to the shopping cart to ensure smooth functionality and a seamless user experience.

PROJECTS

ZzzPredict | Python, CSV file, Streamlit | [GitHub](#) | [Streamlit](#)

- Predicted sleep quality with 99% accuracy by building a Random Forest regression model and analyzing factors like occupation, sleep duration, daily steps, heart rate, and stress level.
- Improved user experience by creating a Streamlit app where users can input their own data to get a personalized sleep quality score out of 10 and actionable recommendations.
- Simplified and optimized data processing by encoding occupations into numerical values and fine-tuning the model to handle diverse user inputs effectively.

StickyNotes | JavaScript, React, CSS, and Appwrite | [GitHub](#)

- Developed an intuitive note-taking app that allows users to create, edit, and organize sticky notes by categories and tags.
- Implemented customization options such as color and enabled saving and loading notes using local storage.
- Integrated Appwrite for backend management, ensuring secure user authentication and data handling.

Blog Generator | Llama2, Python, and Conda | [GitHub](#)

- Created an AI-powered tool that generates blog posts from simple topic inputs, using the Llama 2 model to produce high-quality content with minimal effort.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Data Science Fellow, CUNY Tech Prep

Jul 2024 - Present

- Learned key data science techniques like random forest, linear regression, and classification to analyze and predict data trends.
- Built interactive applications to visualize data and provide actionable insights, using tools like RAG.
- Applied machine learning models to classify datasets and improve accuracy by experimenting with different data preparation methods.
- Worked with a team to complete projects using Python and libraries like Pandas and scikit-learn, gaining real-world experience.
